DUBAI WORKSHOP

Applications across kitchens, bathrooms, living spaces and project interiors.

A kitchen surface, made to work hard.

Worktops, splashbacks and islands are planned around daily use, cabinetry and the character of the selected slab.

WATERFALL ISLAND / INTERIOR CONCEPT

KITCHEN WORKTOP & SPLASHBACK

STONE ISLAND WITH SEATING

Edge profiles, waterfall ends, cut-outs, joints and upstands can be coordinated with the kitchen design before fabrication.

A focal point for gathering and service.

From a residential bar to a hospitality counter, stone brings visual weight and tactility to a hard-working surface.

BAR COUNTER & BACK WALL / CONCEPT VISUALISATION

BAR FRONT & METAL DETAIL

ILLUMINATED STONE COUNTER REFERENCE

Plan counter depth, service openings, lighting integration and edge detailing with the joinery and MEP requirements.

Stone that brings calm to the daily ritual.

Vanities, basins, shelves, niches and shower details are designed around the fittings, water management and maintenance needs of the room.

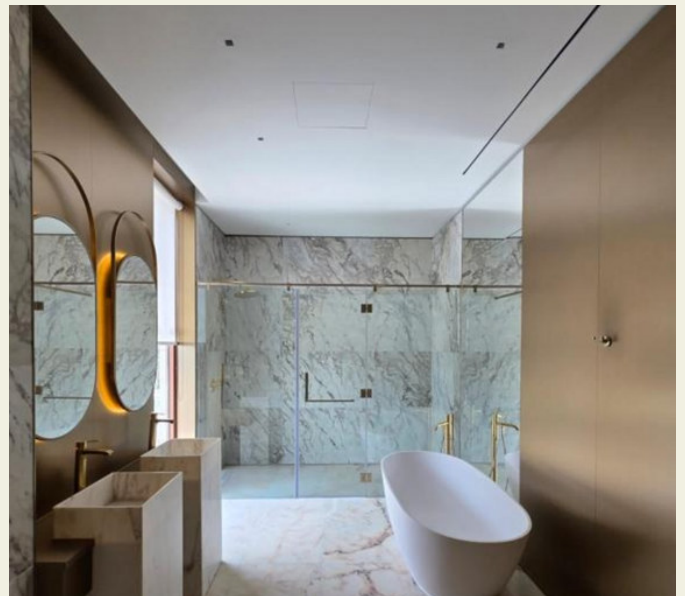

VANITY COUNTER & BASIN

STONE TUB SURROUND

VANITY, STORAGE & WALL FINISH

BATHROOM STONE / CONCEPT REFERENCE

Confirm slab movement, basin geometry, falls and junctions before cutting. Natural stone varies from sample to finished piece.

Made for the way people come together.

A dining table can be quiet or sculptural. The slab, edge, base and seating clearance are resolved as one piece.

ROUND DINING TABLE WITH FLUTED BASE

DINING TABLE / STONE & PROPORTION

STATEMENT TABLE WITH CONTRASTING VEIN

Options include round, oval and rectangular forms, pedestal bases, slab legs and paired or bookmatched surfaces.

Small pieces. Strong character.

Coffee, nesting, bedside and side tables let the stone do something different at a more intimate scale.

NESTING COFFEE TABLES

SIDE TABLE BESIDE A SOFA

STONE CUBE TABLE

OVAL COFFEE TABLE

SCULPTURAL SIDE TABLE

Made to a chosen height and footprint, with the edge and base proportioned to the room.

A considered first and last impression.

Console tables, bedside pieces, plinths and display surfaces can bring stone into the moments between larger spaces.

FLUTED STONE CONSOLE / FEATURE PIECE

SLIM CONSOLE TABLE

STONE PLINTH / DISPLAY BLOCK

Choose a natural edge, clean arris or shaped profile. Consider fixing, floor protection and safe handling for solid stone forms.

Let the stone carry the room.

Feature walls, media walls and fireplace surrounds rely on considered slab selection, setting-out, support and coordination with services.

MARBLE MEDIA WALL & FIREPLACE / CONCEPT VISUALISATION

BOOKMATCHED WALL PANELS / INSTALLATION REFERENCE

FULL-HEIGHT STONE FIREPLACE / CONCEPT

Plan panel sequence, vein direction, access panels, lighting and fireplace clearances before installation.

Architecture from the ground up.

Flooring, stair treads, risers, landings and columns need a clear setting-out plan, consistent levels and careful edge detailing.

STONE FLOOR, STAIR & FLUTED COLUMNS / CONCEPT VISUALISATION

FLOATING MARBLE STAIR / DESIGN REFERENCE

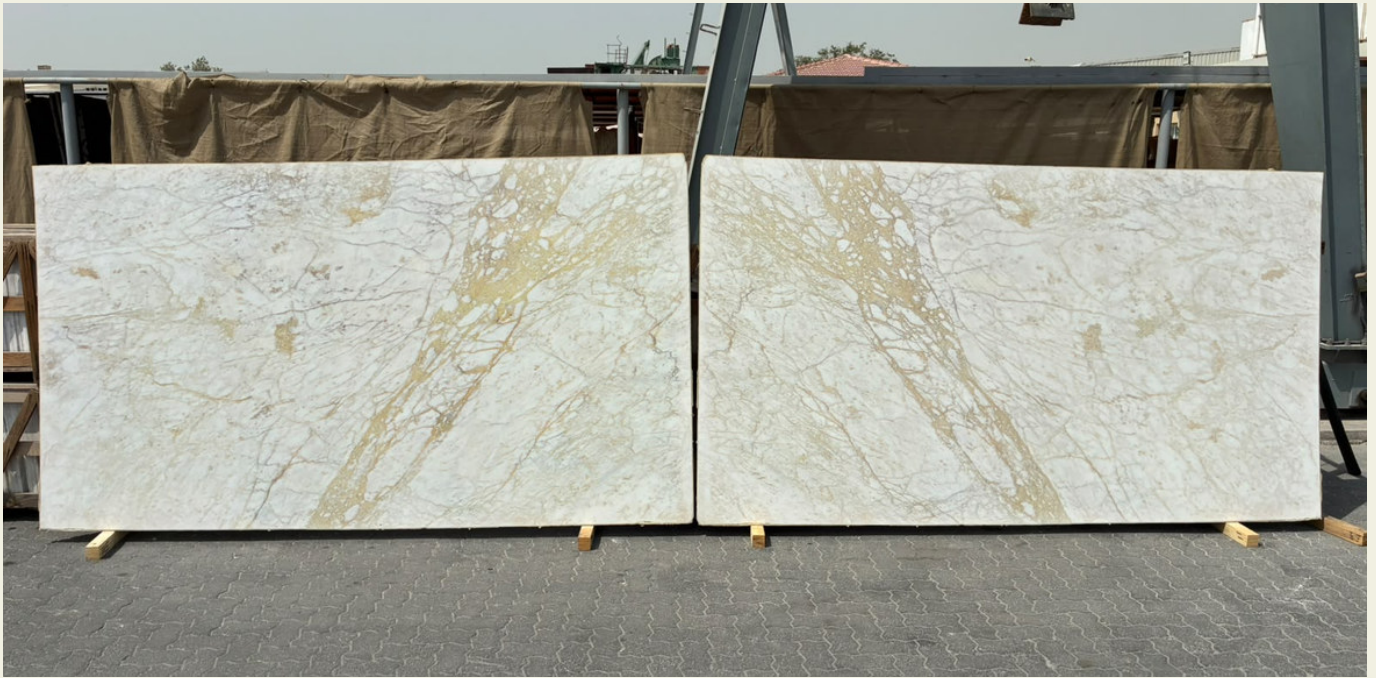

SPIRAL STAIR / STONE APPLICATION

For floors and steps, coordinate slip resistance, movement joints, nosings, transitions and substrate requirements with the project team.

Start with the slab. Finish with the details.

Natural stone is individual. Vein, tone and movement can change across a slab, so the selected material and the cutting plan matter.

SLAB SELECTION & VEIN REVIEW

STONE FURNITURE & FINISH

STONE FORM / FINISH REFERENCE

We review slab availability, the intended use and vein direction before confirming the final layout. Samples help with tone; they cannot show every natural variation.

Resolve the details before fabrication.

A measured drawing helps confirm dimensions, openings, edge profiles, joints and how the stone meets cabinetry, fittings and adjacent finishes.

MEASURED KITCHEN STUDY / ILLUSTRATIVE DRAWING

STONE COUNTER & BASIN DETAIL

STONE FABRICATION REFERENCE

Before cutting: confirm dimensions, thickness, cut-outs, supports, access, stone orientation and installation sequence.

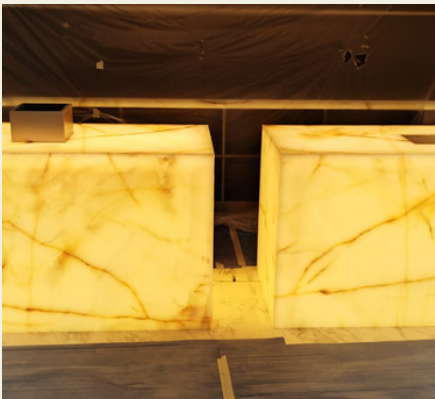

Made in our Dubai workshop.

Our workshop in Dubai manufactures bespoke stone pieces to approved dimensions and details, with material selection and fabrication connected from the start.
